

ManyMaps

ManyMaps is an extension for IntraMaps Enterprise or IntraMaps Public extending the reporting capabilities to allow the user to create a detailed report in a single click. Based on the current selected feature in IntraMaps, ManyMaps can with one click, generate a predefined PDF document containing maps, data and related information. ManyMaps is the ideal solution for LIM production, planning reports, utilities reports and many other reporting needs.

ManyMaps Powerfully Simple

Rich spatially enabled reports
created with a single mouse click

Key benefits

- Save time and reduce costs in generating reports manually
- Create consistency in reports generated
- Increase accessibility to information
- No end user training required
- Highlight related features such as land parcels shared by a common property

Typical applications for ManyMaps

- LIM reports or LIM Maps
- Utility inspection reports
- Planners reports
- Property Maps
- Liquor licensing reports

Key functionality

- Create a many-page report with a single click
- Any combination of maps and data, just maps, or just data can be defined
- ManyMaps leverages IntraMaps functionality
- Smart auto-scaling of maps
- Incorporate data from many sources
- Configure buffers and other temporary spatial features
- Administrator configures ManyMaps template(s)
- Launch ManyMaps directly from a URL or from IntraMaps
- Import pages from multiple PDF documents, for example;
 - Complex Legend Pages
 - Subdivision Specifications
 - Planning Rules
 - In-depth Disclaimers
